

Double Trailer

TRAILER MOUNTED UNITS

Double Trailer | For Ultimate Mobility

Mount your toilet or shower units to our galvanised double trailer

Portable toilet trailers are a great investment for the short term job or jobs in remote locations. Trailers offer ease of movement to the job site and for servicing. Although the purchase is a little more expensive from the beginning ongoing costs can be so much less than servicing of a standard toilet.

To make our toilet trailers more user friendly we contracted a local engineer to design from the ground up. Toilets now sit lower in the frame for a lower centre of gravity, less wind resistance and have a low step into the toilet from the trailer platform.

The **Double trailer** gives you the option of transporting two portable toilets or combination of toilet and shower to your location with ease.

Features
